January 19th, 2012

1:30pm to 2:30pm

Josie's Story: Family Centered Approaches to Patient Safety

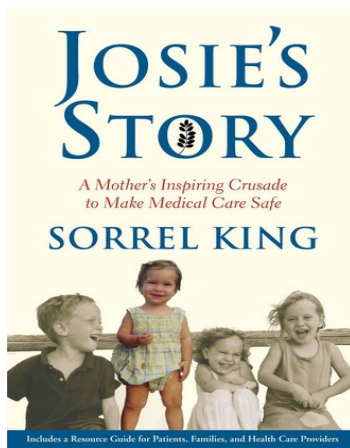

Breakout Session: (add time and location) This breakout session will give participants an opportunity to share ideas with others and talk with Sorrel in a smaller group. Determine what you/your organization will do differently as after today.

- Consider three things you are going to do differently after today.
- Consider three things your unit can do differently.
- Consider one thing that your hospital is going to focus on for 2012.

98,000 people die every year from medical errors, making it one of the leading causes of death in the United States.

The Josie King Foundation's mission is to prevent others from dying or being harmed by medical errors. By uniting healthcare providers and consumers, and funding innovative safety programs, The Josie King Foundation hopes to create a culture of patient safety, together.
